C396ggee

All newly created lots and buildings must be connected to a reticulated recycled water supply system for toilet flushing and garden watering. Where a reticulated recycled water supply system is not available to the building, a building must be connected to a rain water tank with a minimum capacity of 2500 litres for toilet flushing and garden watering or an alternative grey water recycling system to the satisfaction of the Responsible Authority.

3.0 Application requirements

09/03/2017
C301

An application for use, buildings and works, or subdivision must be accompanied by a site assessment of the potential for contaminated land as a result of the previous land uses in areas proposed for a sensitive use (residential use, child care centre, pre-school centre or primary school). If the Responsible Authority is satisfied that this requirement is not relevant to the assessment of the application, it may waive or reduce the requirement.

Activity Centres

A permit must not be granted to use or subdivide land, or to construct a building or construct and carry out works within the land identified as the neighbourhood activity centre in the incorporated *Armstrong Creek East Precinct Structure Plan* until an urban design framework for the neighbourhood activity centre has been prepared to the satisfaction of the Responsible Authority.

Unless the Responsible Authority agrees, the urban design framework must address all of the land in the neighbourhood activity centre and be generally in accordance with the incorporated *Armstrong Creek East Precinct Structure Plan* and must address and respond to Section 4.5 of the incorporated *Armstrong Creek East Precinct Structure Plan* and any other relevant part of the incorporated *Armstrong Creek East Precinct Structure Plan* as appropriate.

A permit may be granted to subdivide land or to construct a building or construct and carry out works prior to approval of an urban design framework if, in the opinion of the Responsible Authority, the grant of the permit will assist in achieving the objectives and the planning and design guidelines for the activity centre set out in the incorporated precinct structure plan.

The urban design framework may be amended to the satisfaction of the Responsible Authority.

Mixed Use Area East of Barwon Heads Road

A permit must not be granted to use or subdivide land, or to construct a building or construct and carry out works within the land identified as the mixed use area east of Barwon Heads Road in the incorporated *Armstrong Creek East Precinct Structure Plan* until an urban design framework for the mixed use area east of Barwon Heads Road has been prepared to the satisfaction of the Responsible Authority.

Unless the Responsible Authority agrees, the urban design framework must address all of the land in the mixed use area east of Barwon Heads Road and be generally in accordance with the incorporated *Armstrong Creek East Precinct Structure Plan* and must address and respond to Section 4.5 of the incorporated *Armstrong Creek East Precinct Structure Plan* and any other relevant part of the incorporated *Armstrong Creek East Precinct Structure Plan* as appropriate.

A permit may be granted to subdivide land or to construct a building or construct and carry out works prior to approval of an urban design framework if, in the opinion of the Responsible Authority, the grant of the permit will assist in achieving the objectives and the planning and design guidelines for the mixed use area east of Barwon Heads Road set out in the incorporated precinct structure plan.

The urban design framework may be amended to the satisfaction of the Responsible Authority.

Subdivision

An application for subdivision must be accompanied by a site analysis and design response as detailed in Clause 56.01. In addition, the site analysis and design response must show or address the following to the satisfaction of the Responsible Authority.

- Integration with the existing or proposed subdivision of adjoining properties including through alignment and configuration of the street network and landscape character.
- The staging of the development.
- Where appropriate, the location of proposed planned community infrastructure, public open space areas and their recreation function.
- An assessment of the existing surface and subsurface drainage conditions on the site by a suitably qualified professional and the potential impacts on the proposed development, including any measures required to mitigate the impacts of springs on the development and the impact of the development on drainage.
- An application for a residential subdivision of 10 lots or more must be accompanied by:
 - a written statement that explains how the subdivision meets the objectives and planning and design guidelines for the Image and Character and Subdivision and Housing elements of the incorporated *Armstrong Creek East Precinct Structure Plan* or the incorporated *Armstrong Creek South Precinct Structure Plan*.
 - subdivision and housing guidelines.

If the Responsible Authority is satisfied that an application requirement is not relevant to the assessment of an application, the Responsible Authority may waive any of the above requirements.

An application for subdivision within the incorporated *Armstrong Creek South Precinct Structure Plan* must be accompanied by a Precinct Infrastructure Plan which addresses the following:

- the provision, staging and timing of stormwater drainage works.
- what land may be affected or required for the provision of infrastructure works.
- the provision, staging and timing of road works internal and external to the land consistent with any relevant traffic report or assessment.
- the landscaping of any land.
- the provision of public open space and land for any community facilities.
- what, if any, infrastructure set out in the *Armstrong Creek South Precinct Structure Plan* is sought to be provided as ‘works in kind’ subject to the consent of the collecting agency.
- any other matter relevant to the provision of public infrastructure required by the Responsible Authority.

Drainage and Floodplain Management

Any application for use or subdivide land, construct a building or construct or carry out works must demonstrate how the proposal affects, or is affected by the requirements of the Armstrong Creek South Precinct Stormwater Management Strategy (ACSSWMS).

The design response must address or provide the following to the satisfaction of the Responsible Authority:

- Stormwater Environmental Management Plans which identify the following:
 - Potential waterway stability/environmental/drainage/flooding problems and constraints arising from their development proposals (including upstream or downstream impacts on existing receiving environments, waterways, land uses and assets/works) and quantify and recommend what is required to ensure compliance with best practice water management objectives.
 - Explicit details on control over stormwater sediment loads and monitoring of same during estate construction works, and demonstrate how the works comply with best practice whilst addressing high construction-era sediment loads, potential acid sulphate soils and dispersive soils management issues.
 - Identification and appraisal of potential acid sulphate and dispersive soils. This assessment is to be peer reviewed by a suitably qualified environmental professional approved by Council.
